It’s not hard to imagine Trump refusing to leave office and using social media platforms to spread lies about the results of the election. For the sake of our democracy, these platforms must be ready to take action and limit the spread of misinformation.

https://accountabletech.org/election-integrity-roadmap-for-social-media-companies
Across Silicon Valley, companies are working with each other and state and local governments to prepare, but significant gaps and vulnerabilities remain. It’s critical that social media companies proactively outline clear, nonpartisan, enforceable policies NOW, rather than reacting haphazardly as crises arise.
TIMELINE OF PROPOSALS
Combatting disinformation early and heightening protections as Election Season progresses is a cumulative process that should unfold in stages.
Begin fully and consistently enforcing existing civic integrity policies.

Eliminate fact-checking exemptions for politicians on posts about voting, election integrity, or results.
KEY PROPOSAL — IMPLEMENT AN **ELECTION INTEGRITY STRIKE SYSTEM**

- Deter and penalize the worst vectors of disinformation.

Implement **warning labels** proactively and retroactively for all misinformation posts.

Provide **context**: Append authoritative content to all voting-related posts.

Roll out weekly **transparency reports** on enforcement of civic integrity policies.
TIMELINE | OCT. 1

KEY PROPOSAL — IMPLEMENT A PLATFORM POLL WATCHERS PROGRAM

- Empower nonpartisan experts as the first line of defense against misinformation.

Elevate election protection and voter assistance hotlines.

Educate users with authoritative information:
- Inform users on what to expect after ballots are cast.
- Provide free advertising credits to state election officials.
- Send users push alerts about early voting in their location.
Tighten **advertising standards** to prevent foul play.
- Apply the highest standard of existing transparency requirements to all ads.
- Place a freeze on new advertisers until post-election.

Limit **algorithmic amplification** designed to boost outrageous content.
- In the final week of voting, platforms must disincentivize false and divisive posts that often travel the fastest.
- Temporarily halt YouTube autoplay and “up next” engine, Facebook Group recommendations, and Trending Topics on Twitter.
KEY PROPOSAL — IMPLEMENT VIOLENCE PREVENTION PRE-CLEARANCE

- Election-related posts from the highest-reach accounts should be precleared for proactive detection and rapid human review, preempting content that would violate incitement of violence and civic integrity policies.

Strictly adhere to AP or NEP results and standards for partial reporting.

- Exercising more restraint and providing more context than usual will be key to staving off widespread distrust in the legitimacy of the results.
KEY PROPOSALS
KEY PROPOSAL:
ELECTION INTEGRITY STRIKE SYSTEM

- ON NOTICE
- REPEAT OFFENDER
- FREQUENT MISINFORMER
- SUPER-SPREADER
A disproportionate amount of harmful misinformation on social media platforms can be tied back to a relatively small number of accounts, groups, and websites that effectively serve as superspreaders.

*Instead of trying to eliminate every problematic piece of content, platforms should impose escalating penalties on the worst offenders.*
KEY PROPOSAL: PLATFORM POLL WATCHERS
Just as election observers ensure the legitimacy of democratic processes and report problems, Platform Poll Watchers should help ensure the integrity of the online information sphere.

Platforms should create specialized verification labels for state Election Directors, as well as nonpartisan civil society groups. These trusted accounts would push out proactive updates in real-time and serve as the first line of defense against misinformation.
KEY PROPOSAL: VIOLENCE PREVENTION PRE-CLEARANCE

DETECTION

ACCOUNTS SUBJECT TO PRECLEARANCE
- Accounts with more than 250,000 followers (including news organizations)
- Accounts with Election Integrity Smears (including news organizations)

Michelle K 1.2M followers
Victor M 6.3M followers
Ryan P 2.9M followers

ALL OTHER ACCOUNTS

James S 3.12M followers

Experts are already warning of an “unprecedented post-election crisis” if the validity of the results is in doubt. The spread of misinformation as ballots are being counted has the potential to cause chaos and even real-world violence.

*Federal elected officials, candidates for office, and other high-reach accounts should be subject to pre-clearance for election-related posts.*
