

January 26, 2022

The Honorable Lina M. Khan, Chair
Federal Trade Commission
600 Pennsylvania Avenue NW
Washington, D.C. 20580

Re: Petition for Rulemaking by Accountable Tech (Docket No. FTC-2021-0070)
A public comment on behalf of grassroots supporters, submitted by Accountable Tech

Dear Chair Khan,

We, the below signatories, hereby submit this public comment to the Federal Trade Commission regarding Accountable Tech's petition to prohibit surveillance advertising (FTC-2021-0070).

Surveillance-based advertising is an inherently unfair method of competition which both relies upon, and cyclically reinforces, monopoly power. This exploitative business model that represents the bulk of the revenue of Big Tech companies harms us as regular users of the internet at the same time as it undermines democracy, civil rights, public health, and competition. When we originally signed up on sites like Facebook and Instagram, we did not know that our data would be exploited for profit through a scheme of surveillance capitalism with great harm to the collective public good.

Given the societal harms of surveillance advertising, we collectively urge the Federal Trade Commission to initiate a rulemaking process to prohibit the anticompetitive practice of surveillance advertising.

Sincerely,

A Diamond, CT
