

From June 26 to 27, 2024, Data for Progress conducted a survey of 1,225 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,225 unless otherwise specified.

[1] Some lawmakers in Congress are proposing spending nearly \$32 billion of taxpayer money to fund the research and development of artificial intelligence (AI) technology in the U.S.

[2] Some lawmakers in Congress are proposing spending nearly \$32 billion of taxpayer money to fund the research and development of artificial intelligence (AI) technology in the U.S.

Other advocates say that taxpayer money should only be invested in AI companies, like Amazon and Google, **after** Congress passes laws requiring AI companies to implement safety guidelines and third-party testing on their products before being sold to the general public.

When thinking about Congress funding the research and development of AI, which of the following statements comes closest to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
Congress should not fund the research and development of AI until they pass laws that require AI companies to implement safety guidelines and third-party testing on their products before being sold to the general public.	73	71	74	74	74	72	61	79	72	74	52	77	68
Congress should fund the research and development of AI, regardless of whether or not they pass laws that require AI companies to implement safety guidelines and third-party testing on products before being sold to the general public.	18	20	15	18	16	20	28	13	17	19	33	15	23

[3] Some lawmakers in Congress are proposing spending nearly \$32 billion of taxpayer money to fund the research and development of artificial intelligence (AI) technology in the U.S.

Ahead of this proposal's release, Big Tech firms, including AI companies, spent \$64 million on lobbying members of Congress, including Senator Chuck Schumer.
